Trooper Trailers™

Single axle compact trailers with a unique shipping design allows unit to ship via common carrier to drastically reduce shipping costs.

Hardware included for mounting wheels

Residential muffler mounted inside enclosure

Pre-wired 4-pin trailer plug

Tongue, jack and chains remove for easy shipping

Permit Hassles?? No Problem!

Acquiring a permit for a generator can be a very time consuming task. In some instances, it can take over a year and delay the installation and use of your newly purchased genset. You can avoid this problem in many jurisdictions by purchasing a trailer mounted generator set. A trailer mounted genset traditionally does not require a permit to install, and enables you to buy, park in place, and immediately use for standby power. Then, once you have received your permit, whether it be months, or even years later, you can just simply remove the trailer and set the generator in its place.

You can also use a trailer mounted genset as a portable or shared power source. All you have to do is simply hook the trailer up to your vehicle and tow it to its new location. This will eliminate the need for having to purchase two separate generators.

We have generator trailers in every size that you may need. From single axle 2,200 GVW to triple axle 26,000 GVW trailers, we have extra wide and long, drop deck and more. If we do not have a design on our list that fits your needs, we will build it for you as a custom trailer.

Let us know what you need and we build it. See our full line of generators from 4 kW to 2500 kW at www.generatorjoe.net
